

Homework for Lecture2

2018038072 임상우 Rim Sangwoo

5-1)

```
1 <!DOCTYPE html>
2 <html>
3   <head>
4     <title>covid-19 review</title>
5   </head>
6
7   <body>
8     <h1>Symptoms of covid-19</h1>
9     <h3>Open Source Web Software by. Rim Sangwoo</h3>
10    <p>Hello! In this homework, I want to tell you some symptoms of covid-19
11    that I had suffered.</p>
12    <ul>
13      <li>Headache</li>
14      <li>Chills</li>
15      <li>Sore throat</li>
16      <li>Back pain</li>
17      <li>Cough</li>
18    </ul>
19    <p>If you caught covid-19, you will be very sick for 3 days.</p>
20    <p>But It will be get better after 3 days. It's better to take medicine if you
21    can't endure pain.</p>
22  </body>
23 </html>
24
```

5-2)

5-3)

I have used both notepad++ and atom.

I chose atom because atom has a package to preview HTML.

It is more convenient than notepad++, because when I use notepad++,

I have to open folder, change directory to html file's path, and then double click.

But in atom, I can see my code and web page at the same time.

Also, atom's workspace design is simple and beautiful.

Lastly, when I open atom, it is operated faster than VScode.

I think it's lighter than VScode.
